KesherCloud

keshercloud.com

A platform for Jewish communities

Your community, connected in one place.

Families, events, school, dues and online payments, email and accounting. A platform built for synagogues, with your community's name and your data kept for you alone.

Spanish and English

Isolated installation per community

Nothing to install

HIGHLIGHTS

Everything your synagogue needs, working together.

Families and members

Complete records: head of household, people with their birth date, membership type, notes and account. Import your current list from a spreadsheet.

Hebrew calendar and yahrzeit

Hebrew dates, each family's yahrzeit and reminders of what is coming.

Dues and online payments

Each charge is paid separately, with a receipt per item. Stripe, PayPal and Donorbox: the money goes straight to your community's account.

Events and space booking

Registrations, waiting list and attendees. Families book spaces, such as the mikvah, and the office confirms.

Religious school

Classes, students, attendance, reports and tuition. Each teacher sees only their own classes.

Accounting ready for your bookkeeper

Your chart of accounts and a balanced journal, by CSV, read-only API or webhooks, for QuickBooks, Xero or your own software.

Let's see how it fits your community.

Explore the demo with sample data or write to us.

AND MORE

Made for the everyday life of a synagogue.

Donations and campaigns

Goal-based campaigns, online donations and donation statements with your community's tax ID.

Mourning notices

Create the notice from a template in Hebrew, Spanish or English, download it as an image or PDF and email it to members.

Family portal

Each family sees its account, pays online, downloads receipts, registers for events and books spaces. Fewer calls to the office.

Email, honors and more

Email to families, honors and aliyot, High Holiday seating, cemetery and plots, synagogue spaces, import and export.

Your data is yours. And it is safe.

- **Isolated installation.** One per community: nothing is mixed with other synagogues.
- **Two-step verification** for administrators.
- **No card data.** Payments go to your community's account; we never see them.
- **Role-based permissions** and an activity log.
- **Encrypted backups** every day, with a second copy off the server.

Nothing to install. We set it up.

1. **We talk**
   You tell us how your community works and what you need.
2. **We prepare your installation**
   With your community's name and details; we import your families from a spreadsheet.
3. **Your community begins**
   Your team and families sign in with their own account. We take care of servers, updates and backups.

Plans that fit your community

Choose the features you need, priced by the size of your community, with a discount for paying annually. When you grow, move up a plan without reinstalling anything. Managed hosting and technical support included.

Let's talk.

Tell us about your community and we will show you the platform at work.
